

TaxInterest products are the professional standard relied on by the IRS and accounting firms nationwide for calculating interest and penalties with unmatched accuracy.

### TaxInterest Software - Ensure the accuracy of IRS interest and penalty calculations

- TaxInterest simplifies calculation of interest on both federal and state tax underpayments and overpayments
- User-friendly interface for tax and payment details
- Audit calculations and totals on transcripts and notices
- Calculate interest and penalties for amended returns, and late or non-filers
- Output reports are widely recognized by taxing authorities for accuracy and detail

### TaxInterest FIN 48 Excel Add-In - Puts the accuracy of TaxInterest into your spreadsheet

- Reduce calculation time from hours or days to only minutes
- Replace "hybrid" state interest calculations with specific state interest calculations
- Add functions to your existing spreadsheet or build one using our provided templates
- Be assured your calculations are current with automatically updated interest rates
- Reduce interest reporting steps during crucial quarter-end crunch time
- Eliminate transcription errors caused by transferring interest figures calculated outside your spreadsheet

# Multiple editions to fit your individual, corporate, or web development needs:

#### **TaxInterest Software**

Project and verify IRS/State interest and penalty calculations

#### **TaxInterest FIN 48**

Calculate IRS and state interest accruals for FIN 48 within Excel

#### **TaxInterest Netting**

The complete solution for performing global interest netting

## TaxInterest Engine Software Development Kit (SDK)

ActiveX DLL or SOAP web service for Windows desktop or web development

#### **TaxInterest Netting - Accurate Global Interest Netting Calculations**

- Reliably determine the optimal global interest netting benefit per section 6621(d)
- User-friendly design for easy entry of IRS transcript and state tax detail
- Summary reports for multiple tax period calculations
- Flexible interface to facilitate easy "what-if" scenario development
- Produce Interest detail reports to show the specifics of each offset and equalization
- Standard and aggressive 6603 deposit calculation options

## TaxInterest Engine Software Development Kit (SDK) – Gives you the power of TaxInterest in your application development

- Accelerate your software development
- Can be used in virtually any Windows programming environment
- Available as a SOAP Web Service and ActiveX COM DLL
- Perfect for web-based or desktop applications
- Eliminate the time needed to research and develop in-house interest and penalty calculations

#### TaxInterest reports are widely recognized by taxing authorities

- Detailed reports are professional and easy to read
- Reports display rates, calculation methods, monthly interest accruals, factors, and more
- Great documentation if there is a discrepancy with the IRS or state agency

# "I use TaxInterest proactively to show my clients position and to negotiate with the IRS."

- Edmund N., Tax Attorney

The IRS processes millions of penalty notices each year.

TaxInterest lets you determine what is actually owed or overpaid of interest and penalty calculations.

Built-in calculation methodology for all jurisdictions - federal, state, and international

Accurate interest calculations regardless of the jurisdiction. No more estimating interest calculations.

### Federal penalty calculations for nine common penalties

Federal penalties include Failure to file 6651(a)(1), Failure to pay 6651(a)(2), Failure to pay assessment 6651(a)(3), and accuracy related penalties.

Interest calculations for all states with income taxes (46 states)

Interest calculations for both individuals and corporations.

### Ability to build your own custom interest rate tables

Create interest rate tables to calculate sales tax, excise tax, etc.

#### Interest rates are updated each quarter

Interest rate updates are provided each quarter via download or CD.

#### Canadian federal (CRA), provincial, and territorial interest calculations

Canadian interest calculations include CRA, nine provinces, and three territories.
