

TValue 6 Amortization Software

MULTI-USER SETUP FOR A SHARED DRIVE

For multi-user licenses, you may get either the Professional Edition or the Enterprise Edition. Both registration keys allow you to install the product on each user's machine that has a license. Enterprise licenses add the ability to run a silent installation and/or to use an MSI installation.

You will receive a unique registration key which will allow you to install TValue 6. This key is for all licensees in your company. You can have each licensed user download and install TValue 6 locally with the assigned registration key. Just copy and paste or type it in when requested. Then use the defaults during the installation process and save the program locally to the C: drive. After the installation, a TValue 6 icon will be added to your desktop. Please keep this registration key in a safe place for future needs.

The Enterprise Edition also provides the ability to either run the installer silently and/or to deploy an MSI installation file. The MSI installation file download link is included in your order's download instructions.

Setup a Shared Drive on your Network Server

If the TValue 6 users want to be able to share their TValue 6 files, you can setup a default directory on your server. The folder would be for each user to point to, e.g. TValue 6 Files.

Here are three different ways to setup the users to share their files:

- Within TValue 6, you can have each user go to File: Options: Startup: and Default Directory. There you can point to the designated folder and then click OK, and all files opened and saved will be in this folder and available for each TValue 6 user.
- When you do the silent install, you can put in a command to setup the Default Directory to the folder that you wish, e.g. TValue 6 Files. Each user that is part of the silent install will have this common folder to open and save files.
- You can copy the workspace file and copy it to all of the computers that will want to share data from TValue 6.

Product Support

If you have any questions, please contact TimeValue Software product support. Support specialists are available from 7:00am to 6:00pm Monday – Thursday and Friday from 7:00am to 5:00pm, Pacific Time.

To reach us by phone, please call 800-426-4741 (within USA) or 949-727-1800. You can also reach us by email at support@TimeValue.com.
